Excerpt: .they were in the respective grades; and the measure used for a system was the average of the amounts furnished by each of the principals of that system.1 Taking the entire twenty-six systems, the number of principal s blanks to a system varies from one to six; and for the seventeen public school systems, from two to six; for nine of the seventeen there were four or more and for six of the remaining eight there were three. Table XXP Amounts and Variabilities of Time Expenditures in Twenty-six Systems. 1 In the case of the sixth grade the amounts furnished by teachers was also included in the average. 2 As stated in Part II, the tables are their own best interpretation and the brief notes that accompany them are not meant to do more than facilitate a general survey by giving sample readings. Reading the column of table XXI marked week minutes the lower numbers opposite each system give the school time expended in studying and reciting arithmetic for one week of each of the first six grades; the upper, the estimated study time used out of school. As the school time expenditures are obviously the more reliable, they are the measure of time cost used in this table and elsewhere, except as otherwise specified. The column marked deviation from the median is self-explanatory, the median being the measure above and below which half the cases lie, which in this table is 1149. The...
